* For basic photo editing, be sure to refer to Photoshop's all-purpose Quick Fix. * For retouching, use the retouching and repair tools, which are located at the bottom of the tools panel. * More advanced image manipulation tools are found in the tools panel's lower-left corner. Here, you can find numerous tools for special photo effects and retouching. As noted in Chapter 1, you can access Photoshop's standard editing tools by choosing Edit > Edit or choosing any of the standard tools from the top toolbar. The Standard editing tools are also listed in the Toolbox on the right side of the screen, as shown in Figure 4-1. Figure 4-1: The Standard editing tools are found at the top of the Tools panel. The Quick Edit tools, such as the Cut tool, come from the lower-left corner of the toolbox. They are not identical to the Standard tools, but they perform many of the same functions. After performing any editing task, click the Save button to save the changes to the original image file, or click the Save As button to save the new changes to a new file. Using the Flyout Windows Photoshop's toolbars contain several toolboxes, including the Filter toolbox. These toolboxes can display a collection of tools, or tools that are related. Some tools are unique to a particular toolbox and cannot be used in any other toolbox. These are called specialized tools. The Filter toolbox is used primarily for basic photo editing tasks. You access many of the tools here by clicking the Filter button at the top-left corner of the Photoshop window. The Filter toolbox contains several tool windows: * Layers window: This toolbox contains a collection of tools that allow you to work on layers in your image. These tools come in two categories: Layer tools (Anchor, Free Transform, Move, Fill, and Stroke) * Style tools (Liquify, Effects, Dodge, Burn, and Color Burn) * Filters window: This toolbox contains a collection of tools for applying special effects to your image. Click the Filter button to access its tools. The Layers window is displayed when you add and edit layers, as discussed in the next section. * Adjustments window: This tool

Photoshop is currently the most widely used graphics editor. It comes in two major versions – Photoshop and Photoshop Elements. The primary difference between the two versions is the features that they offer to the users. Elements was a cheaper version of Photoshop. It was aimed at people who used photography as a hobby. At the time, Photoshop was considered a professional-level program for photographers. In the past, when Photoshop elements was released as a new version, there was a big gap in the product market. Millions of people were stuck using Photoshop for a long time before they upgraded. Fortunately, Adobe has made a relatively smooth transition to Photoshop Elements 2020. You do not have to upgrade to the latest version of Photoshop if you have Photoshop Elements. Photoshop is the best graphic design software for everybody. You will find that people who create professional-quality graphics also use Photoshop. Q: Can I use the is_multisite() plugin to detect multisite users in wordpress? I'm writing a website that will use certain database tables based on whether or not a user is on a multisite or not. The way I have it planned is to use is_multisite() to check this and then I can run the relevant code to populate a certain table. Is there any reason why this wouldn't work? A: This is what I ended up using: if (is_multisite()) { \$url = parse_url(\$_SERVER['REQUEST_URI']); if (array_key_exists('path', \$url) && strpos(\$url['path'], '/')) { \$domain = get_sub_domain(\$url['host']); \$site_id = get_site_option('site_id'); if (!isset(\$site_id)) { \$site_id = false; } \$current_site_id = get_current_blog_id(); if (\$site_id == \$current_site_id) { \$domain = \$current_site_id; } else { \$domain = \$site_id; } } else { \$domain = get_site_option('domain'); \$site_id = get_site_option('site_id'); } } else { \$domain = get_site_option('domain'); \$site_id = get_site_option('site_id'); } Caring for patients with dementia (DAD) Caring for patients with dementia (DAD) Dementia is a condition that causes not only functional impairment but also psychological distress for people caring for them at home.
