Featured Post Ransomware has become a major concern for many organizations; its prevalence has grown due to past successes achieved by threat actors. While each ransomware variant is different, we've seen some common tactics and trends used among the authors of the malware. Although OpenSSH is a secure replacement for Telnet, SSH is not designed to be used for remote connections like Telnet. Use Secure Shell instead. The most obvious difference between SSH and Telnet is that SSH uses encryption whereas Telnet is unencrypted. Telnet does not…'Star's End' Extends Production for Season 3 The news comes hot on the heels of the drama being renewed for a fourth season. The Disney Channel has closed the deal to make a third season of Star's End. The Disney Channel has picked up the 13-episode season with a 13-episode order for Star's End's fourth season, the network announced Tuesday. The news comes hot on the heels of the cable network's Tuesday announcement that the drama had been renewed for a fourth season. In a statement, Disney Channel president Gary Marsh said, "We are thrilled to be working with Kevin and his team once again on Star's End. The cast and crew consistently deliver the best in entertainment, and the show's fans have responded with absolute enthusiasm since the season two finale on Tuesday." Nelson is the youngest of the series' three principle players — she's been playing Young Regina since 2014. The teenage actress said the third season of the series is "very emotional." "I think we found new things with this season," she told TVLine. "It goes to show that you can have different things and different stories, but it's still a Regina show, and it's still Regina's story." Star's End is a Disney Channel TV movie that debuted in August 2015, before debuting as a series that October. It stars Letitia Wright (Black Panther), Erin Darke (Pitch), Darrin Dewitt Henson (Beauty and the Beast) and Roshon Fegan (Grown Ups). The Disney Channel

What's New in the ILike?

iLike is a lightweight and intuitive piece of software that was created to provide you with an easy means of browsing through the contents of your iPhone, iPod or iPad, allowing you to view as well as clean not only the multimedia files, but also the device's system files. Initial analysis Following a brief and uneventful installation process, you can launch the program and connect your iOS device to the computer, for iLike to start analyzing it, revealing all the found issues concerning your apps and the space they eat up. Aside from allowing you to view various details about the device, such as 'Capacity', 'Software Version', 'Serial Number', you can also learn the amount of space that is taken up by the various types of media files: 'Music', 'Photos', 'Videos', or 'Apps' and 'Others'. Browse, export or delete files The left side of iLike's main window lists the sections you can access and browse through, namely the 'System Library', that enables you to learn the structure of your device's system files in tree-view mode, deleting or exporting the ones you want by selecting the appropriate options from the context menu. From the 'Transfer' tab of the utility, you can browse through the 'Apps', 'Photos', 'Music' and 'Videos', providing you with the ability to select individual items which you can export to a preferred location on your PC or simply delete. Furthermore, the 'Cleaner' component of iLike lets you get a detailed account of the 'Temp Files', 'Caches', 'Cookies' or 'Sync-Failed Files'. At the same time, the tool allows you to perform a backup of your device, with a simple push of a button, after which, you can browse through its contents by category ('Photo and Video', 'Contact', 'Message', 'Note', 'Safari Bookmark', 'Calendar Reminder' and 'Call'), saving the items you want to your computer.
