This is the only software out there that when ran will not only shrink images, but shrink and or compress them as well. (the older version was only a photo shrinker) The images are saved as a new copy, but retains the originals sizes and locations. You can shrink images smaller than your screen resolution, if you want. It does a perfect job at shrinking JPG's to fit in smaller windows! Main features:

- or compress images
- resize and scale images
- rename files
- append "a" to the name
- all images in one folder
- all files in one folder
- check boxes to choose which files to scale
- no jpg extension
