"The U.S. Supreme Court has agreed to review a tough question involving possession of gerrymandered maps by officials in North Carolina. If the justices decide to hear the case it could lead to a ruling on whether the maps can be used in the 2020 presidential election." Authors: Mona Elliott and Gregory Cederholm This is not the first time we have provided you with news about Gerrymandering. This is a controversy that has engulfed the state of Florida. The current governor, Ron DeSantis has been accused of taking a pro-Republican gerrymander on the map and even getting it certified by the Florida Supreme Court. In 2016, the Florida Legislature redrew the 6 congressional districts in such a way that the incumbent representatives were re-elected by a slim margin. Republican and incumbent Governor Rick Scott were credited with being the driving force behind this controversial law, and with the new districts being law, they were easily re-elected. Democrats have argued that gerrymandering has been going on since long before Scott or DeSantis were in politics. "Electoral Redistricting" is a term used to describe the process of redrawing the boundaries of electoral districts to try to create a balance between the needs of each political party. Unfortunately, it is a political issue and left to the judgement of the States and the federal government. In order to achieve a fair and balanced vote, some states will end up with more representatives on one political party than the other. "Gerrymandering" refers to a political practice of redistricting a political subdivision, such as a district or a state or other electoral district, so as to enhance the chances of a partisan advantage for one of the political parties by minimizing or cance

1. Field of the Invention The present invention relates to the control of the rotational speeds of two-speed bicycles. More specifically, the invention relates to the equalizing of the rotational speeds of the front wheel and the rear wheel by connecting the front wheel and rear wheel to the frame of the bicycle through a VELCRO band. 2. Description of the Related Art Motorcycles, high-performance bicycles and two-speed bicycles are in common use for racing, mountain climbing, and daily transportation. The so-called "California" style of two-speed bicycle, shown in FIG. 1 and described in U.S. Pat. No. 5,362,105 (the "'105 patent"), has enjoyed considerable popularity as a two-speed road bicycle. This bicycle is similar to a conventional bicycle except for the manner in which it is operated to switch from a first, high speed to a second, lower speed. The California bicycle utilizes a VELCRO band having a continuous strip of hook-and-loop material at either end. One end of the VELCRO band is fastened to the rear wheel hub, while the other end of the VELCRO band is fastened to the front wheel axle. When the user pedals the bicycle, the rapid rotation of the rear wheel causes the VELCRO band to stretch and pull taut. When the user releases the pedals, the VELCRO band is kept taut by the force applied to the pedals. The VELCRO band travels along with the bicycle as it turns in the wheel. The user can shift the bicycle from the high speed position to the low speed position by releasing the VELCRO band from the rear wheel hub, which causes the VELCRO band to slow the rear wheel. Similarly, the user can shift the bicycle from the low speed position to the high speed position by releasing the VELCRO band from the front wheel, which causes the VELCRO band to accelerate the front wheel. In operation, the bicycle shown in FIG. 1 and described in the '105 aa67ecbc25

When we initially shipped, they said they would be shipping it with the new gate. Should I call them if it does not arrive with the gate? I realize that they could sell it without the gate, but I think that shipping with the gate should be a guarantee. Thank you. Rob BTW, I love the WRX. I plan to get that one. P.S. Please email me a list of things I should consider before installing it. That said, and if you choose not to pay, be aware that the dealer is not responsible for shipping it, nor for
