In 1985, CADworkbench (a programming language) was developed for programming AutoCAD features, with the ability to add further features, to increase the user experience. Version 2.0 of AutoCAD and CADworkbench were released in September 1985. AutoCAD was introduced to the public in February 1987. The name was chosen by a software company, Computer Associates, which was working with the University of Utah on a new programming language, called CADworkbench. This language was the predecessor of AutoLISP. AutoCAD was expanded to Windows in 1993, the Mac version in 1997, and the Android and iOS versions in 2015. The program was developed by Brian D. Hurst, Chris Marti, and Rod Young at the University of Utah (as part of the University of Utah University Research Center) as a part of a university project to build a CAD system for its own use. Their system, called "Elmos", was a "Windows-based, vector-graphics, user interface system written in Fortran IV." The first version of AutoCAD, however, was not released until six months later, in April 1983. Later, Hurst, Marti, and Young sold the rights to Elmos to a company called Computer Associates, a pioneer in the computer industry, and released the first commercial version of AutoCAD as AutoCAD Version 1.0. In February 1985, the program was revised again, this time by Ainsley Williams and John Mortenson at Autodesk Inc. (the original developers of AutoCAD and AutoLISP).
