Q: Crystal reports 11.0.2 - SyntaxError: unexpected end of file i tried to access a database of unix server (that i dont know the login details of) from my local windows PC. everything works fine using ms access 2010 and the Windows part of Crystal reports 11.0.2. but when I try to open my report in Crystal reports 11.0.2 i get this error: Error while opening the document. SyntaxError: unexpected end of file. I have seen this error when I try to open a.rdlc file or a.xsd but I can't figure out where the problem is (the problem can be solved if I do just the windows part of crystal reports or access database in ms access but not both - so if someone has a clue that might be helpfull) A: I know this may be the wrong route but I had similar issues and found that it required me to delete.rdlc files and start again. Not sure if this would help but I got it to work. Q: Where is my SQL syntax error? This code

was supposed to run and insert a row to a database.
