Here's what's new: FIFA 22 introduces a new 'Aerial Rush' gameplay mechanic, allowing users to pass and shoot to take on opponents from a standing position. Attack plays in FIFA 21 were improved to create more scoring opportunities, and the ability to dribble was improved to match the agility of the players in the game. Users can track and call for the assist in a new dynamic action indicator, which provides a graphical representation of the chances a player is creating for a team mate. Ball-carriers will receive more attention from defenders, meaning less time trying to beat them. Users can even now manipulate the on-field atmosphere using the de-clencher tool, removing players from the pitch or diverting them towards their own bench. Users can now form a team in more than 16 million FIFA Ultimate Team cards, including drafts and the FA Cup, for the first time. In FIFA Ultimate Team, players can now be drafted from the full or premium card pool. There are currently 20 new cards to collect. FIFA 22 also includes improved features to manage multiple screens, including letting you quickly switch between screens while in an action, to learn the latest as well as other improvements designed to make your game more fun. With an arsenal of features new to the game, a large number of improvements to existing gameplay mechanics, and a variety of new ways to play, FIFA 22 will change the way you've played and enjoyed the beautiful game for years.
