The compatibility list is here. Extensions work only in the Firefox addressbar. User.js must be enabled for it to work. Workspaces and tabs are saved to your cache and your browser's history. Customize your spaces and tabs to your needs. Approved by Mozilla Firefox and used by many users. Firefox TabManager is a simple add-on, which aims at integrating the Tab Manager in Firefox. This add-on aims at providing the user a simple way of managing all the open tabs and/or windows. It is possible for example to save/open all the tabs at once, to rearrange them, group them, to change the background color of the tabs. In the context menu, the user will find these options: • Show all tabs • Show all tab groups • Show all tab windows • Show all open tab windows • Hide all tab windows • Save all open tab windows • Save all tabs (delete all at once) • Switch to the first tab • Toggle the status

FoxyTab Crack + [2022-Latest]

Firefox Tab Switcher Tab Switcher is a powerful Firefox add-on that can be used to quickly switch between opened tabs. It offers you a lot of useful options: The most useful are the ability to change the tab color, add/remove toolbar buttons, sort tabs or switch between all tab opened to the same URL. Some of the less useful but often used options are the ability to duplicate the active tab or add a new tab. With these you can for example use the tab switcher as a horizontal archive. Tab Switcher can be useful if you open a lot of tabs at the same time, but you do not want to waste your time clicking on the tabs again when you want to switch to them. It can be configured to just open the tabs when you hover a certain mouse-pointer over them, but also to move them to the left or the right if you activate a mouse-button or trigger a keyboard command. With the Tab Switcher you can open a new tab and instantly close all the current opened ones. With just one click you can easily do that even for hundreds of opened tabs. ... About FoxyTab FoxyTab is a free add-on which aims at adding a collection of tab-related actions, some so popular that they just might become part of Firefox's basic package. Design and options The design is simplistic, yet effective. The customizable options are vast, you could say limitless. Amongst the things you can change or do with this extension one can enumerate: duplicating tabs, cloning tabs, merging windows, saving pages as PDFs or sorting them by URLs. The ability list is much longer than that, which means that if you ever blamed Firefox for not having a specific tab option, chances are you will find it in FoxyTab. In order to further customize your preferences, you can check out the neatly organized extension panel. Usability When it comes to usability, FoxyTab excels, because it's not intrusive but not invisible either. You can see the icon and options while browsing either on the toolbar or in the context menu. This means that you have all the firepower at your fingertips. There are many scenarios in which FoxyTab could prove useful. One of the most interesting abilities it has is to save the page you are viewing as PDF. It will definitely come in handy if you need an offline copy for later use. FoxyTab is an add-on which will definitely make life b7e8fdf5c8

What's New in the FoxyTab?

• Clone tabs • Duplicate tabs • Merges tabs • Saves pages as PDF • PDF output to clipboard • Tab saving To: • PDF clipping • PDF printing • Tab sorting • Sorting output to clipboard [△](#) Note that the final version can be found here [FoxyTabs Firefox Add-on for cloning your tabs](#) FoxyTabs Description: [△](#) Note that the final version can be found here *****Interested in getting your hands on this product? We are looking for people to test it before we release it for real. Interested? Write to us at support@firefox-addon.com to take part.***** FoxyTabs description FoxyTabs is a Firefox addon designed to clone your current set of tabs into a new tab set. You can also duplicate tabs (duplicate) and move tabs to other window (merge). It also makes it possible for you to save your tabs to PDF or print them. The addon is completely free to use. The addon opens a new Firefox tab and puts your active tabs in it. The new tab can be named however you want, and the current Firefox window is shut while your new tab is opened. Once a tab has been duplicated, you can right-click on it and choose the action of your choice (copy, merge, save as PDF etc.). FEATURES - create a new tab with the current set of tabs (and all their history) - duplicate a tab - move tabs to new tab window - merge tabs - select the action to be taken for each tab (copy, copy as csv, save as PDF etc.) DESIGN FoxyTabs is designed to be very small, unobtrusive, simple and easy to use. The user interface is divided in four different parts: - the tab tree, which contains the tabs that are currently active - the list on the left with actions available when you click on one of the tabs - the preview pane with the active tab - the right pane with the actions to be taken for that tab Tabs are presented in tree form, sorted by the last page visited. A right-click on a tab gives you the choice of actions. Right-clicking on the top-level tree elements gives you the options to copy a tab, duplicate a
