1. Free download! 2. Download and unzip it! 3. Extract to your SD card, the root file ext2 is sdfat.img.
4. Load it into your device using ODIN 5. It will say "firmware update successful" with a red background. Hi dont work in my android "firmware update successful"" "odin insert sdfat.img""please insert sdcard" "sdcard.update.sdfat.img" is located in sdfat folder in extracted folder. how can I download this file from 4shared? Hi max so i want to know your link for great friware is 4shared or google drive? Cause i have 4shared account and i use google in android phone. And plz tell me how can I download the files with that google account? Hi @Drinking Monsters Thanks, im from uk. All my files are zip files from uk, but in 4shared have all kinds of files, (.rar,.exe, etc). How can i use the files without that i need to install programm with root? You can't download files from 4shared? It's not very difficult. It's not allowed to download. Sun5i android a13 s9060.img I have a problem that my 4shared account use a different google account. I want to use my google account in my phone. I see here that someone downloaded the file from 4shared that I want. The problem is that I can't save the file because it say you can't download this file. How can I use the file. I have a file from 4shared but it is not a zip file. I thought that it could be a zip file so I downloaded its itung zip extractor and it said that the file is not a zip file. I don't know what to do. Do you think that the file is not a zip file? Hello, i think it was not a zip file. the file is like windows does not know to understand it. I think the file is like that: G:\4SHARED\125625684921\suntore-a13b-sun5i-a13-s9060-en-0620.img; G:\4SHARED\125625684921\suntore-a13 d0c515b9f4
