Give your songs some modern and beautiful looking on your iPod and Android devices. With the help of these iPod and Android skins you can easily change the look of your device, just like the images of an iPod, Android smartphones or tablets. All these skins are available for the iPod Touch and iPhone 4, iPhone 4s, iPhone 5, iPhone 5c, iPhone 5s, iPhone 6, iPhone 6 Plus, iPod Touch 5th Generation, iPod Touch 6th Generation, iPod Nano 4, iPod Nano 5, iPod Nano 6, iPod Nano 6th Generation, iPad Mini 3, iPad Mini 4, iPad Mini 5, iPad Air, iPad Mini 3 7.9 inch, iPad Mini 4, iPad Air 2, and iPad Mini 4 7.9 inch. Highlight: How to install: Just download the skin file, which is your iOS or Android device's default theme, from here and then transfer the skin file to your iOS or Android device's "app" folder on your computer. After that, connect the phone with the computer via a cable, and then open the iTunes, or Android's built-in package installer. Now, select the file and install it. After finishing the installation process, you are ready to change your iOS or Android device's look to the same as the ones from the iTunes, or Android. How to customize: After installing the skin, you can change the look of your device, as well as the icons, fonts, folders, etc. Just like Windows and the iOS, the new skin comes with the customization option. Open the device's "app" folder and select "Themes". Now, you can customize the look of your device. Another method of customization is to open the "app" folder on your computer, and click on the "Skins" option. Here, you will be able to see all the available iOS or Android skins. Choose the one, which you like. KeyMacro enables you to replace any word (like: man, folks, item, etc.) with a preset word of your choice, on all the files in a directory. Simply rename your files in KeyMacro, and it will replace every occurrence of the target word with your selected replacement word, thus correctly identifying them. Main features: KeyMacro is an easy to use application that can replace any word with any other, regardless of file or folder name. Ex. Imagine that you want to rename "RACHAEL-1988" to "GAY, HOMOSEXUAL" on all the files in the RACHAEL folder. Simply rename all the files inside the folder, and you will be done. You can assign a variable name ("the word to replace") to each file, and specify a word as a replacement, on each file separately. Possible keymacro word replacements: Variables' names can be created using the "New Variable" button. You may save as many variables as you need, for each file. You may export the variables, as a simple text file, using the "Export Variables" button. You can view the settings of a specific file using the "Edit file settings" button. You may specify the target word to replace, and the replacement word, at the same time, using the "Search and Replace" button. You may apply a keyword filter, in order to replace the files only that contains a specific word, for example: "RACHAEL". You may create a loop, to perform the replacement on all the files in a directory. Settings of a file may be saved inside the file itself, using the "Settings" button. You may select a file or a folder in a dialog, in order to automatically load the settings of that file or folder. You may select several files in a dialog, in order to automatically load the settings of all the selected files. You may export the settings, for each file, using the "Export settings" button. You may save the settings, as a simple text file, using the "Save settings" button. You may open the settings of a specific file in a text editor. You may open the settings of a specific file in a text editor, and specify the file to open it. You 2edc1e01e8
