Boachsoft LowRider Free Download

Boachsoft LowRider Cracked Accounts is a tool to track all activities in your company. If your work is as complex as to deal with a fleet of vehicles, Boachsoft LowRider can manage all the information on a monthly or yearly basis. It's a simple tool that can be run on any Windows version, although the database in which it operates must support .NET Framework. Furthermore, it can export all data to XML files, which is considered to be a standard file format. Boachsoft LowRider has a powerful search and database editing abilities, and all users can easily share a company's information using your own password. Pros: Boachsoft LowRider can be used to manage work activities, customers, inventory, parts, and vendors. All information can be saved and exported to different file formats. Cons: The program's functionality relies on .NET Framework, which can make it hard to find. You can't import data directly from .XLS, .CSV, or .TXT files. Conclusion: Boachsoft LowRider lets you track all your work activities in a database, but its functionality only works with the .NET Framework. It can export the data to XML files, and all users can access the entire database using your own password. However, since it's not widely available, you might want to look for alternatives. Boachsoft LowRider Key Features: You can add multiple accounts and easily edit them You can add a business type and set start and end dates You can create reports and export them as several file formats Support for companies, parts, customers, and vendors Groups of users can be assigned to a company and have their own password Use a password to protect a company database One-click data entry Database creation and maintenance with a dedicated tool System Requirements: .NET Framework - 2.0 or higher Windows 2000/2003/2008 Boachsoft LowRider is a software that is developed by Boachsoft. The program is available as a free download. Boachsoft LowRider can be very useful when it comes to automating a company's business activities. If you have a large business, you will surely need a dedicated software that can manage all information you need. If you are dealing with a large auto repair company, chances are that
