More capabilities added to Photoshop Workflow. Two new Custom Actions allow users to add an inline action or toggle customizable keyboard shortcuts directly from within Photoshop. An Experimental Custom Action works as a repeatable one-click action and provides a quick and simple way to accomplish tasks. Custom Actions can be saved to a library so that users can create and share their own. Additionally, filters can now be applied to images in a separate tab from the document. Filters that can apply to a selection (like Highlights, Shadows, and Adjustment) can be dragged in to make them immediately visible in the file. This also works to apply a filter to all of the image's content, by making a selection of the contents of an image and choosing Filter > Adjust > Light and Shadows. Photoshop Workflow enhancements.
